

HOW TO SUBMIT DOWNLOAD CARD FILES

Please go to the link below to submit your download card audio:

<https://ext.furnacemfg.com/downloadcards/submission/LP/>

Before proceeding, please make sure you have read and completed the following items prior to uploading your files:

Is your Downloadable Content ZIP file 250MB or less?

Keep in mind that there is a 250 mb limit for audio files, otherwise we will need to upgrade to a higher level of audio data hosting. Contact your CSR or Sales Rep if this is the case.

Have you added proper metadata to your audio files?

Metadata adds band names, song titles, track #s, album art, genre, etc to your files. If not, your customers may have trouble finding your files once they drop them into iTunes or other audio program..

The metadata is the information that will appear on your physical card, so be sure to double check spelling.

Our system will auto-generate names based on provided information and our internal filing system.

Custom file naming carries an additional charge of \$50 for custom work.

When you click the “Send It In!” button, be patient.

There is no progress bar, but our servers are accepting and confirming your file. When the file successfully uploads, you will be redirected to a confirmation page.

We will be sure to send you test codes for approval before printing, so please let your CSR know when you have finished uploading.
